

ICT Initiatives in Gautam Budh Nagar

NIC in Gautam Budh Nagar has been striving hard for implementation IT Enabled services for general citizens, farmers, traders, students, employees & district administration. The district is also geared up for extending the ITES in the rural areas through implementation of kiosks, single window systems, network connectivity etc, bringing more departments, directorates and services under the fold of IT. Some of major projects completed are -

- eDistrict – Launched on 29th December 2008. 23+ services are being offered through the eDistrict Centres, Tehsil Centres, Lokvani Centres and Common Service centres being established across the state.
- Bhulekh – a farmer application for rural land holders with distribution of Record of Right (RoR) from the tehsil computer centre implemented in both the tehsils of the district.
- Land Registry – Land / Property Registration System.
- eScholarship & Fee Reimbursement – Online transfer of scholarship to the bank account of the beneficiaries of the district belonging to Minority, OBC, SC, ST & General category.
- Old Age Pension Disbursement directly to the bank account of pensioners.
- Tehsil Diwas – Collection & redressal of public grievances at the Tehsils. All the applications received and action taken is available of the NET for public access with an excellent disposal rate for more than 90%.
- Ration Card Digitisation – BPL and APL ration cards database is being prepared for implementation of effective distribution of food grains through fair price shops.
- Transport Computerisation – Vehicle Registration, Tax, Permit, Enforcement have been computerized at the RTO/ARTO Offices of 40 districts
- VAT Computerisation – Online VAT system has been implemented to benefit the traders of the two districts. Vyapari Suvidha Kendra with state-of-art ambience has been created to facilitate traders for filing of their tax and returns with ease.
- Content rich website for the district has been hosted on the web.

Nivesh Mitra

A online project for submission and tracking of application received at GM DIC center was developed by Nic Lucknow and was implemented by us at district. The project was aimed for removing the hassles that the investors have to face for obtaining the necessary approval from different departments for setting up of industry. Now the investor can apply online for the approval from different departments and can trace the status of its application.

Digitization of Ration Card

A innovative step is taken by digitization of ration card holders data for BPL,APL,Antodaya yojna . Software was launched for district supply office for computerizing all the ration card data and makes it online for easy redress of public complaints and speedy disposal of application.

New services under eDistrict Project

eDistrict project was launched as a pilot project in six districts of UP for providing citizen centric services to common people This year three new services was added to the existing services. The services include online application for new ration card, birth and death certificate, and recovery certificates. Necessary infrastructure was built for launching these services. Computers were installed at every node and broadband connectivity is provided. Networking of all the three thesils and RF connectivity was established between Collectorate and Vikas bhawan.

NEW Jan Suvidha Kendra was inaugurated at sector-19 City Magistrate office to cater the needs of urban population of Noida.

Touch Screen Kiosk for Land Record Computerization

A need was felt that general public could have access to their Digitized land records at any time and that too in their own language. A touch screen kiosk was established where public could self operate the kiosk and can have updated information about their land records.

Scholarship Management System (SMS)

A Landmark project was initiated by NIC Lucknow for the computerization of distribution of scholarship in the entire U.P. This ambitious project was time bound and includes data entry work of nearly 2.5 lakh students of primary, upper primary, Post-metric students of Gautam Budh Nagar. The major activities carried out are -

- Master Data base preparation for schools in our district
- Updation of bank and branches of our district
- Finalization of agency for data Entry
- All technical support and troubleshooting of software

- Periodically Exporting data to central server at lucknow
- Generating correction list, data modification, ensuring data validity
- Various Reports generation for amount released by banks in various phases

Digital Record Room

In order to have proper and authentic data of Old manual Khatauni's a need was felt to have there wear out records to be scanned and digitized so as to digitally save the data on computer and can be provided to the general public on demand. This step has helped us to save the age-old records way back of british ear to be saved. We verified the same and compiled based on our own requirements. GB Nagar was one of the first to complete this activity in time and successfully. Total **of 7,09586** records of pages was scanned and khautani of 1359 fasli year was taken as base for digitization. 153 villages of dadri thesil, 142 villages of thesil sadar and 92 villages of thesil jewar was taken for scanning so total 387 villages data was digitized

PROJECTS IN PIPE LINE

Touch Screen kiosk

A centralized Nagrik soochna Kendra situated at collectrate campus for dissemination of all the necessary information related to various departments for general public. This information center is very helpful for general public as now they do not have to run from one office to another for obtaining desired information The center has a touch screen kiosk can be operated like Bank ATM. The entire process bring transparency and accountability. The necessary software for touch screen was developed at NIC G.B Nagar center in vb.net

Collectorate Area Network

A high speed dedicated network for the district level officers at collectorate and vikas Bhawan based on OFC connectivity and UPSWAN as backbone is under implementation. This will connect some of the important offices like District supply office, social welfare office, chief development officer, district development office, All the ADM and SDM will be joined on this network so as to speed up the communication which in turn will help the general public in getting their work done faster and in transparent manner.

SMS based Immunization alert system

A new approach is conceptualized where all the data of new born babies and pregnant ladies are being kept at centrally located server and the regular updates and alerts are being sent to inform the parents and the pregnant ladies about the necessary vaccines need to be given to the infant and timely health check up. The project has wider implication on the national level programme like pulse polio, vaccinate immunization. Janni yajona, infant mortality. child malnutrition. The social message can be delivered like save girls child etc.
